Profiles	<div><div><div><div></div></div><div>Faosy Adebimpe</div></div><div><div><div></div></div><div>faosy-adebimpe</div></div><div><div><div></div></div><div>Faosy Adebimpe</div></div></div>	
Summary	<div>Backend Developer with experience designing RESTful APIs, server-side logic, and database integration using Node.js and Express. Skilled in building scalable and maintainable backend systems, with a strong understanding of performance optimization and data flow. Committed to clean architecture and efficient backend operations.</div>	
Experience	<div><div><div>Philmoore Stores</div><div>Software Developer</div><div><div><div></div></div><div>https://philmoorestores.com/</div></div><div><div><div></div><div>Assisted in streamlining stock updates through automated scripts.</div><div>Managed internal tools and backend processes related to inventory.</div><div>Supported backend logic for inventory reconciliation.</div></div></div></div></div> <div><div>February 2025</div><div>Lagos Island, Balogun Market, Lagos State, Nigeria</div></div>	
Projects	<div><div><div>B-Store</div><div>An e-commerce book store web app</div><div><div><div></div></div><div>https://faosy-adebimpe.github.io/bstore/</div></div><div>Built a live, interactive bookstore app using React, TailwindCSS, Zustand, and React Router. The app features a responsive UI with placeholders for books, user accounts, and product listings. While it doesn't support real transactions, the live version demonstrates front-end functionality, routing, and state management, offering a seamless user experience. Hosted online for demonstration purposes.</div><div>React, Tailwindcss, Zustand</div></div></div> <div><div><div>Anywears</div><div>E-commerce Project</div><div><div><div></div></div><div>https://faosy-adebimpe.github.io/anywears</div></div><div>Developed an e-commerce website called Anywears to showcase my frontend development skills using React, Redux Toolkit, TailwindCSS, and the FakeStore API for dummy data. The website features a responsive and visually appealing interface, demonstrating product browsing, cart functionality, and dynamic data fetching. Although not fully functional, Anywears serves as a portfolio piece to highlight my ability to build modern, user-friendly web applications with strong UI/UX design principles and effective state management.</div><div>React, Redux Toolkit, TailwindCSS, FakeStore API, JavaScript, Responsive Web Design, State Management, API Integration, UI/UX Design, Git, GitHub</div></div></div> <div><div><div>Todo App</div><div>The To-Do App is a sleek and user-friendly task management application designed to help users organize their daily tasks with ease. Built using React, React Router, and Tailwind CSS, this app combines modern design with essential functionality for efficient task management.</div><div>React, React Router, Tailwindcss</div></div></div> <div><div><div>Job Tracker API (Planned)</div><div>Backend system for tracking job applications with endpoints for CRUD, filtering by status, and sending email notifications.</div><div>Node.js, Express</div></div></div>	<div><div>December 2024</div></div> <div><div>September 2024</div></div> <div><div>April 2024</div></div>
