✕ Faosy Adebimpe

Summary

Full Stack Developer with experience in building robust web applications from frontend to backend. Proficient in JavaScript, React, Node.js, and TypeScript. Passionate about building scalable systems and clean, responsive interfaces. Able to bridge the gap between design and functionality to create complete digital products.

Experience

Philmoore Stores   February 2025

Software Developer   Lagos Island, Balogun Market, Lagos State, Nigeria

🔗 https://philmoorestores.com/

- Built internal tools to digitize inventory operations.
- Designed and implemented frontend dashboards.
- Developed simple backend scripts to automate stock reporting.

Projects

B-Store   December 2024

An e-commerce book store web app

🔗 https://faosy-adebimpe.github.io/bstore/

Built a live, interactive bookstore app using React, TailwindCSS, Zustand, and React Router. The app features a responsive UI with placeholders for books, user accounts, and product listings. While it doesn't support real transactions, the live version demonstrates front-end functionality, routing, and state management, offering a seamless user experience. Hosted online for demonstration purposes.

React, Tailwindcss, Zustand

Anywears   September 2024

E-commerce Project

🔗 https://faosy-adebimpe.github.io/anywears

Developed an e-commerce website called Anywears to showcase my frontend development skills using React, Redux Toolkit, TailwindCSS, and the FakeStore API for dummy data. The website features a responsive and visually appealing interface, demonstrating product browsing, cart functionality, and dynamic data fetching. Although not fully functional, Anywears serves as a portfolio piece to highlight my ability to build modern, user-friendly web applications with strong UI/UX design principles and effective state management.

React, Redux Toolkit, TailwindCSS, FakeStore API, JavaScript, Responsive Web Design, State Management, API Integration, UI/UX Design, Git, GitHub

Todo App   April 2024

🔗 https://faosy-adebimpe.github.io/todo-app/

The To-Do App is a sleek and user-friendly task management application designed to help users organize their daily tasks with ease. Built using React, React Router, and Tailwind CSS, this app combines modern design with essential functionality for efficient task management.

React, React Router, Tailwindcss

Job Tracker App (In Progress)

Custom dashboard to track job applications. Includes user authentication, job status filtering, and backend CRUD operations.

Node.js, Express, React, Tailwind

Skills

Frontend

HTML, CSS, SCSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS

Backend

Node.js, Express.js

Tools & Platforms

Git, GitHub, Vercel, Postman, Insomnia, Figma, VS Code

Others

API Integration, Responsive Design, Authentication, State Management, REST API Development
